

## BW750 – Steel/Elastomer cylinder head gasket for Rover K series engine

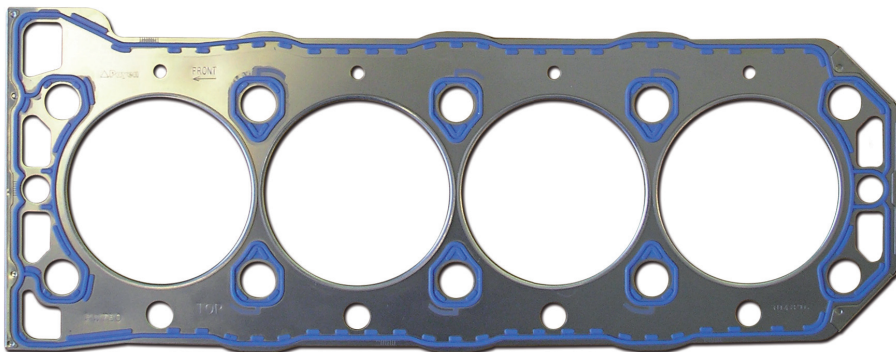

Please note that this gasket which was supplied as Original Equipment to Rover and Land Rover before the introduction of the MLS version BW5750 will, due to new manufacturing specifications, change in appearance.

In line with current OES supply, Federal-Mogul will now provide this gasket with a **BLUE silicone Selected Area Coating (SAC)**. The new specification will be supplied on a rolling change basis as existing stocks with a RED silicone SAC are exhausted throughout all distribution networks.

**C30 BLUE silicone is OE Engineering approved** and this 'cosmetic' only change also brings BW750 into line with other Federal-Mogul Steel/Elastomer gaskets using C30 silicone, such as the PSA XUD9 and DW10 engines.

BW750 – **CURRENT** OES & AM version

BW750 – **NEW** OES & AM version
